

# Object manipulation using TIAGo robot

**Coordinators:** Prof. Irina Mocanu ([irina.mocanu@upb.ro](mailto:irina.mocanu@upb.ro)), Dr. Bogdan Cramariuc (CITST SRL)

**Objectives:** The goal of the project is to detect, recognize and manipulate objects using TIAGo robot. Solution based on convolutional neural networks will be used (eg. GraspQuality Convolutional Neural Network).

**Research subject continues existing work and can be funded through a scholarship.**
